The article “Metabolomic profiling of amino acid alterations in anorexia nervosa: implications for appetite regulation and therapeutic strategies”, by K. Donato, K. Dhuli, A. Macchia, M.C. Medori, C. Micheletti, G. Bonetti, M.R. Ceccarini, T. Beccari, P. Chiurazzi, S. Cristoni, V. Benfatti, L. Dalla Ragione, M. Bertelli, published in *Eur Rev Med Pharmacol Sci* 2023; 27 (6 Suppl): 64-76–DOI: 10.26355/eur-rev\_202312\_34691–PMID: 38112949 has been retracted by the Editor in Chief for the following reasons.

Following some concerns raised on PubPeer, the Editor in Chief has started an investigation to assess the validity of the results. The outcome of the investigation revealed that the manuscript presented major flaws in the following:

- Issues with ethical approval
- Undeclared conflict of interest

Consequently, the Editor in Chief mistrusts the results presented and has decided to retract the article.

The authors disagree with this retraction.

This article has been retracted. The Publisher apologizes for any inconvenience this may cause.
