Department of Hematology, The Affiliated Chaohu Hospital of Anhui Medical University, Chaohu, Anhui, China

The article “Interferon- γ affects leukemia cell apoptosis through regulating Fas/FasL signaling pathway” by H.-L. Xia, C.-J. Li, X.-F. Hou, H. Zhang, Z.-H. Wu, J. Wang, published in Eur Rev Med Pharmacol Sci 2017; 21 (9): 2244-2248 – PMID: 28537657 has been retracted by the Editor in Chief.

Following some concerns raised on PubPeer (link: <https://pubpeer.com/publications/2F360E066992B-4078059C72F8530B3>), the Editor in Chief has started an investigation to assess the validity of the results as well as possible figure manipulation.

The authors have been informed about the journal’s investigation but remained unresponsive and have not provided the study’s raw data.

The journal’s investigation revealed a duplicated area in Figure 1 between panels 100 U/mL and 1000 U/mL.

Consequently, the Editor in Chief mistrusts the results presented and has decided to retract the article.

This article has been retracted. The Publisher apologizes for any inconvenience this may cause.
