Retraction Note: Overexpression of long non-coding RNA TUG1 alleviates TNF-α-induced inflammatory injury in interstitial cells of Cajal

Department of Gastroenterology, The Affiliated Hospital of Qingdao University, Qingdao, China

We are still conducting research in the effect of long non-coding RNA TUG1 in interstitial cells of Cajal recently. It turned out that some of the current experimental results are inconsistent with the previous results. Some data cannot be repeated by further research. We need to further confirm the effect of long non-coding RNA TUG1 on alleviating TNF-α-induced inflammatory injury in interstitial cells of Cajal and for this reason, the authors all agreed to withdraw the manuscript.
