Author Correction: Long non-coding RNA HEIH modulates CDK8 expression by inhibiting miR-193a-5p to accelerate nasopharyngeal carcinoma progression

Department of Otorhinolaryngology, Qilu Hospital (Qingdao), Cheeloo College of Medicine, Shandong University, Qingdao, China.

After publication, the authors found some mistakes in the article.

The Publisher apologizes for any inconvenience this may cause.

The correct sections are reproduced below.

- Figures 1, 2, and 4 report some wrong data. The authors have checked their raw data and realized that they had chosen the incorrect data for the analysis.
- In the paragraph entitled “CDK8 Was a Direct Target Gene of MiR-193a-5p in NPC”, “R2=0.6701, Figure 4G” was changed into “R2=0.6490, Figure 4G”.

Figure 1. The expression of HEIH and miR-193a-5p were found in NPC. A, The expression of HEIH in NPC tissues (n=46). B, HEIH expression in NPC cell lines (SUNE-1, 6-10B, 5-8F and C666-1) and NP69 cells. C, MiR-193a-5p expression in NPC tissues. D, MiR-193a-5p expression in NPC cell lines (SUNE-1, 6-10B, 5-8F and C666-1) and NP69 cells. **p<0.01.
Figure 2. HEIH played as a sponge of miR-193a-5p in NPC. A, The binding sites between HEIH and miR-193a-5p. B, Dual-Luciferase assay. C, The expression of miR-193a-5p with si-HEIH and HEIH vector in SUNE-1 cells. D, HEIH expression regulated by miR-193a-5p mimic or inhibitor. E, HEIH negatively regulated miR-193a-5p expression in NPC tissues. **p<0.01.

Figure 4. CDK8 was a target gene of miR-193a-5p. A, The binding sites between miR-193a-5p and CDK8. B, Dual-Luciferase reporter assay. C, The expression of CDK8 in NPC tissues. D, CDK8 expression in NPC cell lines and NP69 cells. E-F, CDK8 mRNA expression and protein expression in SUNE-1 cells with miR-193a-5p mimic or inhibitor. G, CDK8 was negatively correlated with miR-193a-5p in NPC tissues. H, CDK8 was positively correlated with HEIH in NPC tissues. **p<0.01.
