

# Declarations and Final Statements

All manuscripts must contain the following required statements at the end of the paper:

- **Conflict of Interest:** All authors must disclose any personal and financial relationships with other people or organizations that could influence (bias) their work. Examples of potential competing interests include consultancies, employment, stock ownership, honoraria, paid expert testimony, patent applications and registrations, and grants or other funding. In this section, authors must disclose any potential conflict of interest. Example of authors' declaration of personal interests: (i) [Name of individual] has served as a speaker, a consultant and an advisory board member for [names of organizations] and has received research funding from [names of organization]. (ii) [Name of individual] is an employee of [name of organization]. (iii) [Name of individual] owns stocks and shares in [name of organization]. (iv) [Name of individual] owns patent [patent identification and brief description]. If authors do not have conflicts of interest to disclose, they should include the following sentence in this section: "The authors declare that they have no conflict of interest to disclose".
- **Ethics Approval:** An Ethics Committee should have approved human and animal studies but, in questionable matters, the Editors reserve the right to reject papers. For more details, visit the page "[Journal Policies, COI and Licensing](#)". Example of Ethics Statement: "All subjects provided written informed consent for inclusion before they participated in the study. This study was conducted in accordance with the Declaration of Helsinki of 1975 (as revised in 2013), and the protocol was reviewed and approved by the Institutional Review Board (or Ethics Committee) of NAME OF THE INSTITUTE (project or protocol identification number XXX and date of approval)." OR "Ethical review and approval were waived for this study, due to REASON (please provide a detailed justification)."
- **Informed Consent:** Informed consent must be obtained for studies conducted on humans. A statement that informed consent was obtained from the study participants must also appear in the manuscript as follows: "All subjects provided written informed consent for inclusion before they participated in the study.". Example of Informed Consent declaration: "Written informed consent was provided by the patient (and/or his/her parents) for permission to receive therapy and to publish this case report."
- **Acknowledgments:** Brief acknowledgments of subjects who have made genuine contributions to the article and who endorse the data and conclusions should be included. In this section, authors must include written permission to use any copyrighted text and/or illustrations. In this section, authors are required to disclose any source of financial support to their work and/or all relevant consultancies within 12 months prior to submission (for more details, visit the page "[Journal Policies, COI and Licensing](#)").
- **Funding:** In this section, authors must list any funding source and funding interests. For example: "This work was supported by the National Institutes of Health [grant numbers xxxxx, yyyy]". Example of declaration of funding interests: (i) This study was funded [in part or in full] by [insert name of funding organization], grant number [insert grant or another identification number]. (ii) The [writing or preparation] of this paper was funded in part by [insert name of funding organization]. (iii) Initial data analyses were undertaken by [name of individuals if not listed as Authors] who are employees of [name company] and received funding from [insert name of funding organization]. (iv) Writing support was provided by [insert name of individual(s)] of [name company] and funded by [insert name of funding organization]. We remind that manuscripts published in **European Review for Medical**

and **Pharmacological Sciences** by authors funded by the National Institutes of Health (NIH) are eligible for indexing in MEDLINE/PubMed. If the article is accepted for publication and the work was supported by NIH, authors should insert the NIH grant number(s) in the Funding section of the manuscript. If the work was not supported by any source of funding, authors should use the following sentence “No funding is declared for this article”.

- **Authors’ contributions:** For transparency purposes, we request a short paragraph indicating the individual contribution of each author for articles with more than one author (author names should not be abbreviated). This information includes substantial contributions to the conception and design of the study, acquisition of data, or analysis and interpretation of data; drafting the article or making critical revisions related to the relevant intellectual content of the manuscript; supervision; validation and final approval of the version of the article to be published.
- **ORCID ID:** In this section, authors should include their ORCID ID, a unique and persistent author identifier to help distinguish their work from that of other researchers. ORCID ID should be supplied as follows: e.g., Camillo Ricordi: <https://orcid.org/0000-0001-8092-7153>.
- **Data availability statement:** European Review for Medical and Pharmacological Sciences encourages authors to provide a statement about data availability in their articles containing **original data**. Data availability statements should include information on where data supporting the study results can be found, including, if applicable, hyperlinks to publicly archived datasets analyzed or generated during the study. Data availability statements can also indicate if data are available on request from the authors and where no data are available, if appropriate. Data availability statements can take one of the following forms (or a combination of more than one of the following forms):
  - The datasets generated during and/or analyzed during the current study are available in the repository [NAME], [PERSISTENT WEB LINK TO DATASETS].
  - The datasets generated during and/or analyzed during the current study are not publicly available due [REASON WHY DATA ARE NOT PUBLICLY AVAILABLE] but are available from the corresponding author on reasonable request.
  - Data sharing does not apply to this article as no datasets were generated or analyzed during the current study.
  - The datasets generated during and/or analyzed during the current study are available from the corresponding author on reasonable request.
  - All data generated or analyzed during this study are included in this published article [and/or its supplementary material].
