

Supplementary Table II. List of the active principles divided according to the target apparatus and pharmacological mechanisms of action, with indication of the type of side effect using a number from 1 to 4 (1: ototoxic drugs; 2: drugs inducing tinnitus; 3: drugs inducing vertigo or dizziness; 4: drugs inducing generic hearing disorders) and the scale of severity according to Adverse Drug Reactions (ADR) - a: very common ($\geq 10\%$); b: common ($\geq 1\%$ e $< 10\%$); c: uncommon ($\geq 0.1\%$ e $< 1\%$); d: rare ($\geq 0.01\%$ e $< 0.1\%$); e: very rare ($< 0.01\%$); f: unknown).
